

# 30th Street Improvements

Arapahoe Avenue/SH7 to Boulder Creek

Cost Estimate

**\$4M**

This project proposes to build elements for a protected intersection on the south side of 30th Street and Arapahoe Avenue, raised protected bicycle lanes, and sidewalks on the west and east sides of 30th Street from SH7/Arapahoe Avenue to Boulder Creek Greenway. These design elements are part of the recommended

corridor design from the recently completed 30th Street Corridor Study and East Arapahoe Transportation Plan. These improvements support the city's Vision Zero program goals of eliminating fatal and serious injury collisions, reducing other collision types for people using all travel modes and improving the travel conditions for pedestrians and bicyclists by addressing travel comfort and security. These improvements support the Flatiron Flyer Bus Rapid Transit (BRT) at Boulder Junction with improved facilities for first and final mile access to transit.
