Executive Summary

Summary of Survey Methods

The 2023 City of Boulder Community Survey provided residents the opportunity to rate the quality of life in the City of Boulder, as well as the quality of service delivery and overall workings of local government. The survey also permitted residents to provide feedback to government on what is working well and what is not, and to share their priorities for community planning and resource allocation.

Survey invitations were mailed to 6,000 randomly selected resident households in September 2023. A total of 895 surveys were completed, yielding a response rate of 15%. In addition to the scientific survey of randomly selected households, a link to an online, community-wide, open participation survey was publicized through various channels, including the City of Boulder website and social media. This open participation survey was identical to the scientific survey and open to all Boulder residents, and 324 responses were received. The key findings and body of this report focus on the 895 responses to the scientific survey; the results to the open-participation survey have been provided separately in *Appendix G: Open Participation Survey Results* on page 196).

Survey results were weighted so that respondent gender, age, housing unit type (attached or detached), housing tenure (rent or own), race, and ethnicity were represented in proportions reflective of the entire adult population of the City. The margin of error is plus or minus three percentage points around any given percentage point reported for all survey respondents.

Because Boulder has administered resident surveys before, some comparisons could be made between 2023 responses and those from 2018 and 2016. Boulder also elected to have its results compared to those of other jurisdictions around the nation and communities in the Front Range in Colorado. Comparisons are made possible through a national benchmark database created and maintained by Polco/National Research Center (NRC). This database contains resident perspectives gathered in resident surveys from over 500 jurisdictions over the past five years.

Key Findings

Quality of life is high in Boulder.

- Boulder residents continue to rate quality of life highly, with 85% awarding excellent or good marks in 2023. This rating was similar to national and Front Range benchmarks.
- At least 8 in 10 survey participants gave high marks to Boulder as a place to visit and as a place to live, while about three-quarters of residents positively rated Boulder as a place to work and as a place to raise children.
- More than half of community members rated Boulder as a place to retire and the sense of community as either excellent or good.

- All overall community ratings were similar to both national and Front Range benchmarks, except for Boulder as a place to work (higher than the Front Range benchmark) and Boulder as a place to visit (much higher than both benchmarks).
- Over 9 in 10 residents positively rated the overall quality of natural environment in Boulder, overall health and wellness opportunities in Boulder, and overall quality of parks and recreation opportunities.
- More than three-quarters of residents gave high marks to the overall opportunities for education, culture, and the arts (lower than previous years), overall quality of the utility infrastructure in Boulder, and the overall quality of the transportation system.
- Seven in 10 survey respondents praised the city as a place for innovation, creativity, and entrepreneurship, while more than half gave excellent or good ratings to residents' connection and engagement with their community.
- Where comparisons were available, all community characteristics were higher or much higher than both sets of benchmark comparisons, apart from residents' connection and engagement with their community and overall quality of the utility infrastructure in Boulder, which were similar to both benchmarks.
- Among the highest rated individual community characteristics were fitness opportunities, availability of paths and walking trails, and recreational opportunities, with at least 9 in 10 respondents rating each positively.
- At least 8 in 10 residents gave high marks to opportunities to volunteer, ease of travel by bicycle in Boulder, opportunities to attend special events and festivals, ease of walking, outdoor spaces to gather with large families or groups, and opportunities to attend cultural/arts/music activities.
- Fewer than one-quarter of survey respondents positively rated the variety of housing options and the availability of affordable quality housing.
- While most individual community characteristics declined in 2023 compared to 2018, many of these characteristics were rated higher or much higher than national and Front Range benchmarks.

Residents feel positive about economic aspects of Boulder, apart from cost of living.

- Over 8 in 10 survey participants rated the overall quality of business and service establishments in Boulder as excellent or good.
- About three-quarters of residents gave high marks to the vibrancy of the downtown/commercial area and shopping opportunities.
- Two-thirds of respondents positively rated the variety of business and service establishments in Boulder, while more than half praised employment opportunities.
- Fewer than 1 in 10 residents positively rated the cost of living in Boulder.
- Compared to 2018, respondents in 2023 rated the vibrancy of the downtown/commercial area and employment opportunities less positively.
- Overall quality of business and service establishments, variety of business and service establishments and employment opportunities were ranked higher than the Front Range

benchmarks, while vibrancy of downtown/commercial area and shopping opportunities were ranked much higher than the Front Range benchmarks. These two aspects were also ranked higher than the national benchmark.

- Cost of living in Boulder ranked much lower than the national benchmark and lower than the Front Range benchmark.

While scores for many City services have declined, Boulder still ranks highly among national and Front Range peers for several services.

- At least 9 in 10 respondents positively rated fire services, sewer services, recreational opportunities in Boulder open space, and drinking water.
- More than 8 in 10 residents gave high marks to recreation programs or classes, ambulance or emergency medical services, recreation centers or facilities, preservation of natural areas, storm water management, and city parks.
- The lowest-rated services, affordable high-speed internet access, snow removal, code enforcement, crime prevention, land use, planning, and zoning, and street repair, were positively rated by at least one-third of residents.
- A number of services received lower ratings in 2023 compared to 2018. These services included: Drinking water, recreation programs or classes, ambulance or emergency medical services, recreation centers or facilities, preservation of natural areas (open space, farmlands, and greenbelts), storm water management (storm drainage, dams, levees, etc.), city parks, overall customer service by Boulder employees, recycling/composting, fire prevention and education, public information and communication, bus or transit services, police/sheriff services, land use, planning, and zoning, street repair, snow removal, code enforcement (weeds, abandoned buildings, etc.), and crime prevention.
- Although many services decreased in quality in 2023 compared to 2018, all items were either similar to or higher than the Front Range benchmarks. Similarly, all items available for national benchmark comparisons were either similar or higher, apart from police/sheriff services, crime prevention, and snow removal which were lower.

Diversity, equity, and inclusion are important residents, and most feel welcome and accepted in the Boulder community.

- About 9 in 10 residents indicated that they feel either very welcome or somewhat welcome at city parks, trails, and facilities.
- More than 8 in 10 respondents indicated that feel safe and accepted at city-sponsored community engagement activities and in the Boulder community, based on their identity.
- Nearly 7 in 10 survey participants indicated that it is either essential or very important for local government to focus on creating a diverse, equitable, and inclusive city.

- About 1 in 10 residents felt that creating a diverse, equitable, and inclusive city is not at all important.

Homelessness is a significant problem in the city, and residents are supportive of funding community-based services for the homeless and those in need.

- Over 9 in 10 Boulder resident indicated that homelessness is a major or moderate problem in the city; only 1% of respondents indicated that homelessness was not a problem in Boulder.
- More than 8 in 10 residents indicated that it is either essential or very important to contribute funding for mental health programs, shelter during severe weather (including severe temperatures), and substance abuse programs.
- Over 7 in 10 respondents indicated that it is essential or very important to contribute funding for supportive housing (which combines housing with services such as job training and substance abuse treatment) and housing/rental assistance programs.

Survey Background

The City of Boulder contracted with Polco/National Research Center (NRC) to conduct a community-wide resident survey. The primary goal of the survey was to assess the attitudes and opinions of residents by:

- Evaluating City programs and services.
- Determining general perceptions of the quality of life in the city.
- Identifying issues facing the city.
- Comparing survey results to other communities across the nation.
- Establishing trendlines to measure government performance over time.

The City of Boulder Community Survey serves as a consumer report card for Boulder by providing residents the opportunity to rate the quality of life in the City, as well as the community's amenities, service delivery and their satisfaction with local government. Residents also provide feedback on what is working well and what is not, and communicate their priorities for community planning and resource allocation.

Focus on the quality of service delivery helps council, staff, and the public to set priorities for budget decisions and lays the groundwork for tracking community opinions about the core responsibilities of Boulder City government, helping to assure maximum service quality over time.

This type of survey gets at the key services that local government controls to create a quality community. It is akin to private sector customer surveys that are used regularly by many corporations to monitor where there are weaknesses in product or service delivery before customers defect to competition or before other problems from dissatisfied customers arise.

This is the 10th iteration of the Boulder Community Survey since the baseline study conducted in 1987.

Survey Administration

A postcard was mailed to 6,000 Boulder households, selected at random, notifying residents that they had been chosen to participate in the survey. One group received a reminder postcard after one week, while another group received a paper copy of the survey. All mailings included a web link so that residents could take the survey online, if desired. There were 895 respondents to the mailed questionnaire (with 125 undeliverable addresses), yielding a response rate of 15%. In addition to the scientific, random sample, a link to an online "opt-in" survey was publicized through various channels including the Boulder website and social media. This opt-in survey was identical to the scientific survey and open to all Sanford residents. A total of 324 online surveys were completed in that effort. The key findings and body of this report focus on the 895 responses to the scientific survey; the results to the open-participation survey have been provided separately in *Appendix G: Open Participation Survey Results*. The margin of error is plus or minus three percentage points around any given percentage for all respondents.

Survey results were weighted so that respondent gender, age, housing unit type (attached or detached), housing tenure (rent or own), race, and ethnicity were represented in the proportions reflective of the entire city. More information about the survey methodology can be found in *Appendix F: Survey Methodology*.

How the Results Are Reported

For the most part, the full set of frequencies or the “percent positive” are presented in the body and narrative of the report. The percent positive is the combination of the top two most positive response options (i.e., “excellent” and “good,” “very safe” and “somewhat safe,” “strongly support” and “somewhat support,” etc.).

On many of the questions in the survey, respondents could give an answer of “don’t know.” The proportion of respondents giving this reply is shown in the full set of responses included in *Appendix B: Complete Survey Frequencies* and is discussed in the body of this report if it is 30% or greater. However, these responses have been removed from the analyses presented in the body of the report, unless otherwise indicated. In other words, the majority of the tables and graphs in the body of the report display the responses from respondents who had an opinion about a specific item.

Precision of Estimates

It is customary to describe the precision of estimates made from surveys by a “level of confidence” and accompanying “confidence interval” (or margin of error). The margin of error for this survey is generally no greater than plus or minus three percentage points around any given percent reported for the entire sample (N=895).

Comparison of Results Over Time and By Subgroups

Results from the 2016 and 2018 surveys are presented when comparisons to 2023 were available. Where differences in ratings from 2018 to 2023 are four percentage points or greater, they can be considered significantly higher or lower.

Selected survey results were compared by geographic location of a respondent’s home, race and ethnicity, age, gender, housing unit type (attached or detached), housing unit tenure (rent or own) and income. These crosstabulations are summarized and presented in tabular form in *Appendix D: Responses to Selected Survey Questions by Respondent Characteristics*. For each pair of subgroups that has a statistically significant difference, an upper-case letter denoting significance is shown in the category with the larger column proportion.

Comparing Survey Results to Other Communities

NRC’s database of comparative resident opinion comprises resident perspectives gathered in resident surveys from approximately 500 communities whose residents evaluated their services. Communities to which Boulder was compared can be found in *Appendix E: Detailed Benchmark Comparisons*. National and Front Range benchmark comparisons have been provided when similar

questions on the Boulder survey are included in NRC's database, and there were at least five communities in which the question was asked.

Where comparisons for quality ratings were available, Boulder's results were generally noted as being "higher" than the benchmark, "lower" than the benchmark or "similar" to the benchmark. In instances where ratings are considerably higher or lower than the benchmark, these ratings have been further demarcated by the attribute of "much," (for example, "much lower" or "much higher"). These labels come from a comparison of Boulder's rating to the benchmark where a rating is considered "similar" if it is within the standard margin of error (10 points or less on the 100-point scale); "higher" or "lower" if the difference between Boulder's rating and the benchmark is greater than 10 points but 20 points or less; and "much higher" or "much lower" if the difference between Boulder's rating and the benchmark is more than twice the standard margin of error (greater than 20 points). Comparisons for a number of items on the survey are not available in the benchmark database. These items are excluded from the benchmark tables.

Quality of Life and Community

The City of Boulder Community Survey contained a set of questions related to quality of community life in the city ranging from the overall quality of life to Boulder as a place to work, to visit and to retire. Survey respondents were also asked to rate several characteristics of Boulder.

Quality of Life

Boulder residents continue to rate the quality of life highly, with 85% awarding excellent or good marks in 2023. This rating was similar than national and Front Range benchmarks (communities in the Front Range area of Colorado; see *Appendix E: Detailed Benchmark Comparisons* for detailed information on the benchmark comparisons). This rating was lower than previous years.

Survey results were compared by geographic location of residency and select respondent demographic characteristics. Survey participants in the areas of Central Boulder, South Boulder, and Southeast Boulder, as well as those with an income below \$100,000, were less likely to positively rate the overall quality of life in Boulder compared to their counterparts (see *Appendix D: Responses to Selected Survey Questions by Respondent Characteristics*).

Figure 1: Overall Quality of Life in Boulder, 2023

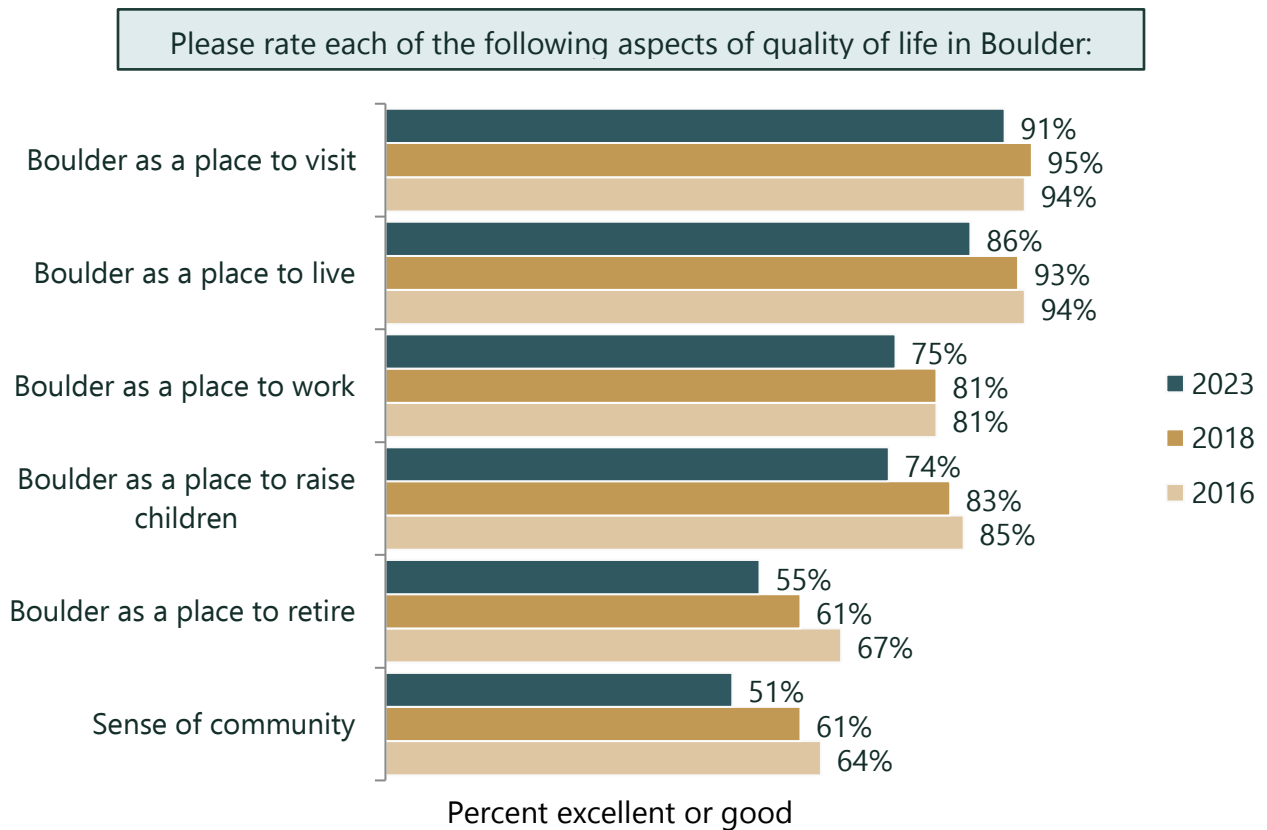

Figure 2: Overall Quality of Life Compared by Year

Residents also assessed other aspects related to quality of life in the city. At least 8 in 10 survey participants gave high marks to Boulder as a place to visit and as a place to live. Additionally, about three-quarters of residents positively rated Boulder as a place to work and as a place to raise children. More than half of community members rated Boulder as a place to retire and sense of community as either excellent or good. Each of these ratings was lower in 2023 compared to 2018. All community ratings were similar to both national and Front Range benchmarks, except for Boulder as a place to work (higher than the Front Range benchmark) and Boulder as a place to visit (much higher than both benchmarks; see Figure 4 on the following page).

When differences were significant, those living in the areas of the University of Colorado, Crossroads, Gunbarrel, North Boulder, and Palo Park, as well as those age 35+ and those with incomes above \$100,000, were generally more positive about these aspects of quality of life compared to other residents. Residents identifying as white, Asian, Not Hispanic, those with an income below \$200,000, or those between the ages of 18-34 were more likely than their counterparts to positively rate Boulder as a plate to visit (For additional comparisons by respondent demographics, see *Appendix D: Responses to Selected Survey Questions by Respondent Characteristics*).

Figure 3: Aspects of Quality of Life Compared by Year

When asked about Boulder as a place to raise children, 35% of residents said “don’t know”. The full set of responses, including “don’t know”, can be found in Appendix B: Complete Survey Frequencies.

Figure 4: Aspects of Quality of Life Benchmarks

Please rate each of the following aspects of quality of life in Boulder:	National benchmark	Front Range benchmark
Boulder as a place to live	Similar	Similar
Boulder as a place to raise children	Similar	Similar
Boulder as a place to work	Similar	Higher
Boulder as a place to visit	Much higher	Much higher
Boulder as a place to retire	Similar	Similar
Overall quality of life in Boulder	Similar	Similar

Community Characteristics

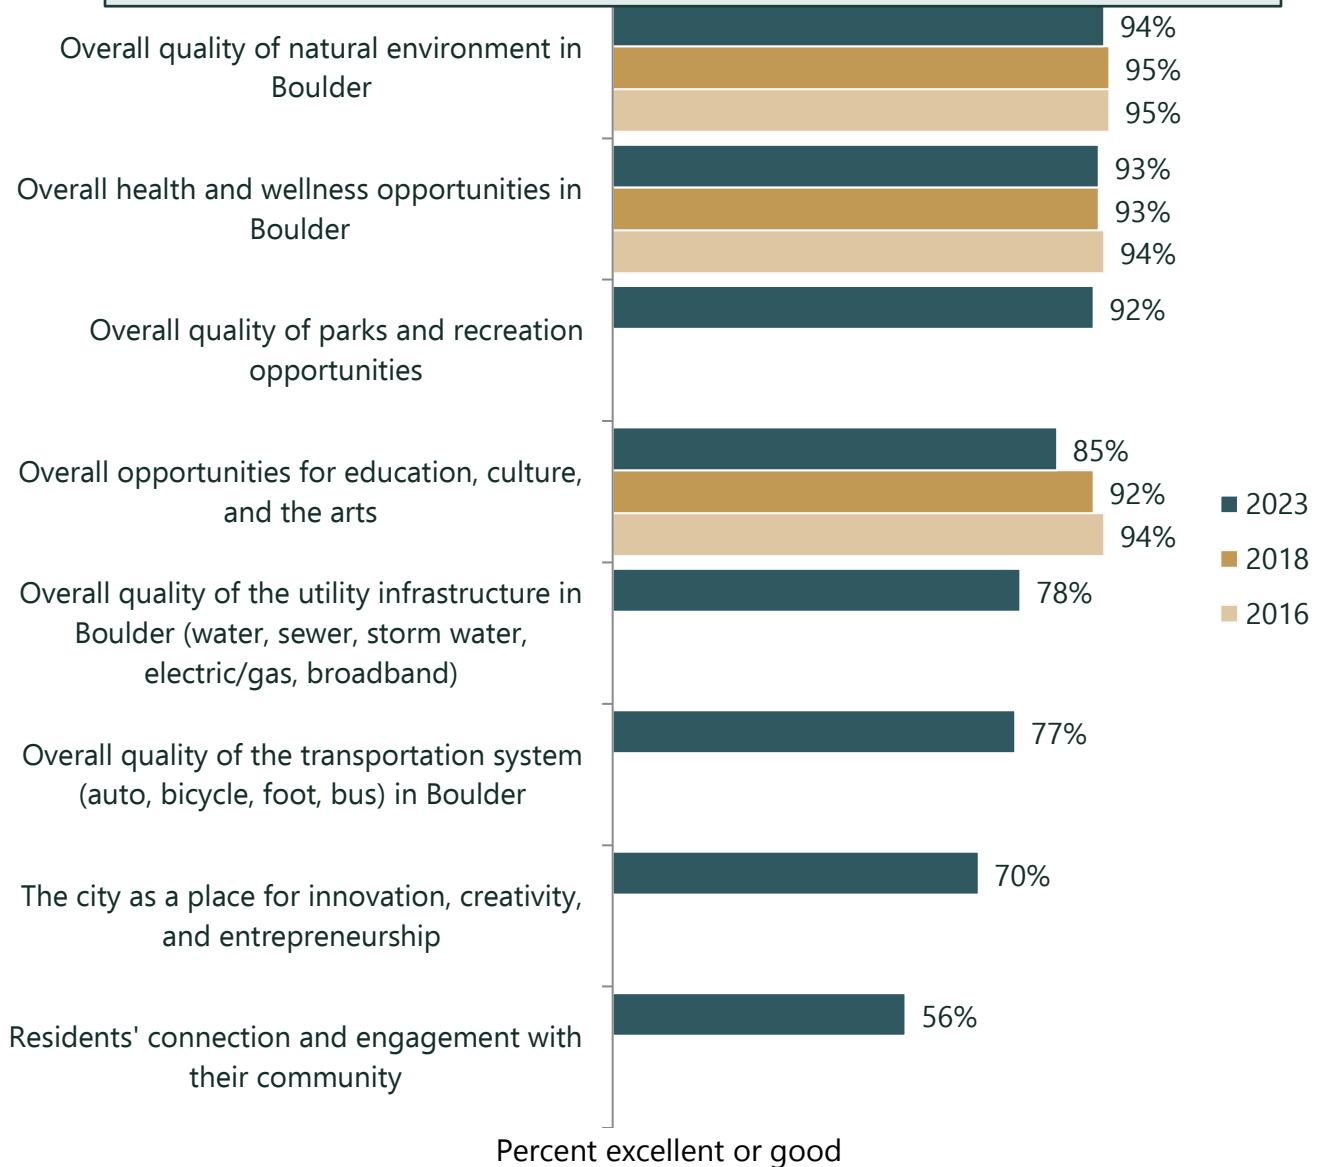

Over 9 in 10 residents positively rated the overall quality of natural environment in Boulder, overall health and wellness opportunities in Boulder, and overall quality of parks and recreation opportunities. Ratings for the overall quality of natural environment and overall health and wellness opportunities were similar to previous years. More than three-quarters of residents gave high marks to the overall opportunities for education, culture, and the arts (lower than previous years), overall quality of the utility infrastructure in Boulder, and the overall quality of the transportation system. Seven in 10 survey respondents praised the city as a place for innovation, creativity, and entrepreneurship, while more than half gave excellent or good ratings to residents’ connection and engagement with their community. Where comparisons were available, all aspects were higher or much higher than both sets of benchmark comparisons, apart from residents’ connection and engagement with their community and overall quality of the utility infrastructure in Boulder, which were similar to both sets of benchmarks (see Figure 5 on page 15).

Comparisons by demographic differences revealed that, in general, residents who identified as nonwhite or multi-racial, as well as those unable to cover all of their expenses without accumulating debt, were less likely than their counterparts to positively rate overall community characteristics of Boulder. Residents living in the University of Colorado area, as well as men, were more likely than their counterparts to positively rate the overall quality of the transportation system. Residents living in the Southeast Boulder area were less likely to positively rate the overall quality of the transportation system in Boulder. Those living in the Central Uni-Hill area, as well as those with an income of less than \$50,000, were less likely than their counterparts to give high marks to the overall quality of the utility infrastructure in Boulder. Those living in South Boulder, as well as those identifying as Hispanic were less likely than their counterparts to positively rate the overall quality of natural environment in Boulder. Residents living in the Gunbarrel area were less likely than residents living in other areas to give positive scores to the overall health and wellness opportunities in the City. Residents living in the Colorado University area were more likely than residents in other areas to highly rate the overall opportunities for education, culture, and the arts. Women, and those

identifying as not Hispanic were more likely than their counterparts to positively rate residents' connection and engagement with their community. Those identifying as Asian were more likely than their counterparts to give high marks to the city as a place for innovation, creativity, and entrepreneurship (see *Appendix D: Responses to Selected Survey Questions by Respondent Characteristics*).

Figure 5: Ratings of Overall Community Characteristics Compared by Year

Please rate each of the following characteristics as they relate to Boulder as a whole.

Prior to 2023, "Overall quality of natural environment in Boulder" was "Quality of overall natural environment in Boulder", "Overall health and wellness opportunities in Boulder" was "Health and wellness opportunities in Boulder", and "Overall opportunities for education, culture, and the arts" was "Overall opportunities for education and enrichment".

Figure 6: Overall Community Characteristics Benchmarks

Please rate each of the following characteristics as they relate to Boulder as a whole:	National benchmark	Front Range benchmark
Residents' connection and engagement with their community	Similar	Similar
Overall quality of the transportation system (auto, bicycle, foot, bus) in Boulder	Higher	Higher
Overall quality of the utility infrastructure in Boulder (water, sewer, storm water, electric/gas, broadband)	Similar	Similar
Overall opportunities for education, culture, and the arts	Higher	Much higher
Overall quality of parks and recreation opportunities	Higher	Higher
Overall health and wellness opportunities in Boulder	Much higher	Much higher
Overall quality of natural environment in Boulder	Much higher	Much higher

Residents were also asked to evaluate several individual characteristics of the community (see Figure 7). Among the highest rated aspects were fitness opportunities, availability of paths and walking trails, and recreational opportunities with at least 9 in 10 respondents rating each positively. At least 8 in 10 residents gave high marks to opportunities to volunteer, ease of travel by bicycle in Boulder, opportunities to attend special events and festivals, ease of walking, outdoor spaces to gather with large families or groups, and opportunities to attend cultural/arts/music activities. Fewer than one-quarter of survey respondents positively rated the variety of housing options and the availability of affordable quality housing.

Several ratings declined from 2018 to 2023, including ease of travel by bicycle, ease of walking, opportunities to attend cultural/arts/music activities, adult educational opportunities, public places where people want to spend time, opportunities to participate in community matters, preservation of the historical or cultural character of the community, cleanliness of Boulder, air quality, ease of travel by public transportation, the availability of affordable quality childcare/preschool, and the availability of affordable quality mental health care. Ease of travel by car in Boulder, ease of public parking, and the variety of housing options were rated higher by respondents in 2023 compared to 2018.

However, many characteristics were rated higher or much higher than both national and Front Range benchmark comparisons. These characteristics included fitness opportunities (including exercise classes and paths or trails, etc.), availability of paths and walking trails, recreational opportunities, opportunities to volunteer, ease of travel by bicycle in Boulder, opportunities to attend special events and festivals, ease of walking in Boulder, opportunities to attend cultural/arts/music activities, and community support for the arts. Additionally, public places where people want to spend time and

ease of travel by public transportation were rated higher than the Front Range benchmark. Only three items were rated lower than the benchmarks. Air quality was rated lower than the national benchmark, while variety of housing options and availability of affordable quality housing were rated lower than the Front Range benchmarks (see Figure 8).

Residents identifying as white or Asian, as well as those under age 55 and those able to cover all of their essential expenses without accumulating debt, were generally more likely to rate these community characteristics more positively than their counterparts (for additional comparisons, please see *Appendix D: Responses to Selected Survey Questions by Respondent Characteristics*).

Figure 7: Ratings of Individual Community Characteristics Compared by Year

Please also rate each of the following in the Boulder community. (Percent excellent or good)	2023	2018	2016
Fitness opportunities (including exercise classes and paths or trails, etc.)	96%	95%	96%
Availability of paths and walking trails	94%	95%	95%
Recreational opportunities	93%	95%	97%
Opportunities to volunteer	85%	86%	90%
Ease of travel by bicycle in Boulder	82%	87%	89%
Opportunities to attend special events and festivals	82%	NA	NA
Ease of walking in Boulder	81%	87%	89%
Outdoor spaces to gather with large families or groups	81%	NA	NA
Opportunities to attend cultural/arts/music activities	80%	87%	86%
Clarity and language options of signage in public spaces	79%	NA	NA
Community support for the arts	78%	NA	NA
Adult educational opportunities	77%	85%	87%
Quantity and variety of city activities, programs, and/or locations available to children and teens under 18	72%	NA	NA
Public places where people want to spend time	68%	85%	85%
Opportunities to participate in community matters	68%	77%	76%
Preservation of the historical or cultural character of the community	65%	93%	88%
Ease of travel by car in Boulder	64%	39%	43%
Cleanliness of Boulder	62%	88%	89%
Water resources (beaches, lakes, ponds, riverways, etc.)	62%	NA	NA
Air quality	62%	81%	87%

Ease of travel by public transportation in Boulder	56%	63%	69%
Ease of public parking	54%	32%	29%
Well-designed neighborhoods	52%	NA	NA
Well-planned commercial growth	41%	NA	NA
Well-planned residential growth	37%	NA	NA
Availability of affordable quality childcare/preschool	32%	43%	50%
Availability of affordable quality mental health care	28%	53%	56%
Variety of housing options	23%	19%	20%
Availability of affordable quality housing	9%	8%	10%

At least 30% of respondents said “don’t know” when rating the following characteristics: Quantity and variety of city activities, programs, and/or locations, the availability of affordable quality childcare/preschool, adult educational opportunities, and the availability of affordable quality mental health care. The responses presented in the body of the report are for those who had an opinion. The full set of responses, including “don’t know” can be found in Appendix B: Complete Survey Frequencies.

Figure 8: Individual Community Characteristics Benchmarks

Please also rate each of the following in the Boulder community.	National benchmark	Front Range benchmark
Fitness opportunities (including exercise classes and paths or trails, etc.)	Much higher	Much higher
Availability of paths and walking trails	Much higher	Much higher
Recreational opportunities	Much higher	Much higher
Opportunities to volunteer	Higher	Higher
Ease of travel by bicycle in Boulder	Much higher	Higher
Opportunities to attend special events and festivals	Higher	Higher
Ease of walking in Boulder	Higher	Higher
Opportunities to attend cultural/arts/music activities	Higher	Higher
Community support for the arts	Higher	Higher
Adult educational opportunities	Higher	Much higher
Public places where people want to spend time	Similar	Higher
Opportunities to participate in community matters	Similar	Similar
Preservation of the historical or cultural character of the community	Similar	Similar
Ease of travel by car in Boulder	Similar	Similar

Cleanliness of Boulder	Similar	Similar
Water resources (beaches, lakes, ponds, riverways, etc.)	Similar	Similar
Air quality	Lower	Similar
Ease of travel by public transportation in Boulder	Higher	Higher
Ease of public parking	Similar	Similar
Well-designed neighborhoods	Similar	Similar
Well-planned commercial growth	Similar	Similar
Well-planned residential growth	Similar	Similar
Availability of affordable quality childcare/preschool	Similar	Similar
Availability of affordable quality mental health care	Similar	Similar
Variety of housing options	Similar	Lower
Availability of affordable quality housing	Similar	Lower

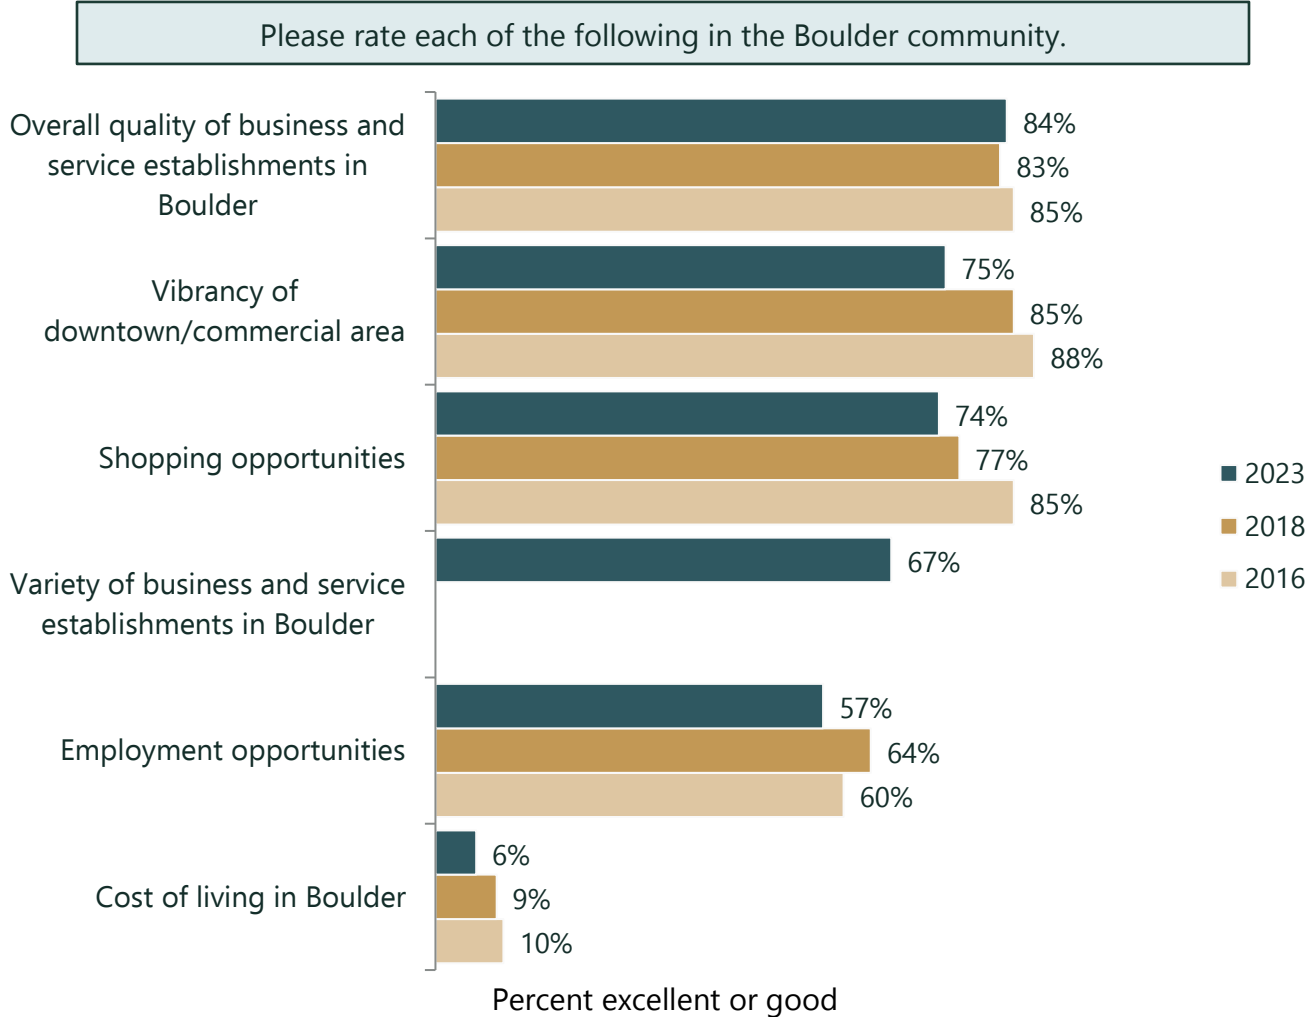

Economy

As in previous years, survey participants were asked about various aspects of the economy in Boulder (see Figure 9). Over 8 in 10 survey participants rated the overall quality of business and service establishments in Boulder as excellent or good. Additionally, about three-quarters of residents gave high marks to the vibrancy of the downtown/commercial area and shopping opportunities. Two-thirds of respondents positively rated the variety of business and service establishments in Boulder, while more than half praised employment opportunities. Fewer than 1 in 10 residents positively rated the cost of living in Boulder. Compared to 2018, respondents in 2023 rated the vibrancy of the downtown/commercial area and employment opportunities less positively (Please see *Appendix F: Survey Methodology* for more information on how to interpret changes over time.)

Boulder ranked higher than other national and Front Range communities for many economy-related areas. The overall quality and variety of business and service establishments, as well as employment opportunities, were ranked higher than the Front Range benchmarks, while vibrancy of downtown/commercial area and shopping opportunities were ranked much higher than the Front Range benchmarks. These two aspects were also ranked higher than the national benchmark. One item, cost of living, ranked much lower than the national benchmark and lower than the Front Range benchmark.

In terms of differences between subgroups, those unable to cover all of their essential expenses without accumulating debt were less likely than their counterparts to positively rate all aspects of the economy in Boulder. Those with an income of less than \$50,000 were less likely than their counterparts to highly rate employment opportunities. Residents between the ages of 18-34 were more likely than their counterparts to positively rate the vibrance of downtown/commercial area and shopping opportunities. Men were also more likely than women to highly rate shopping opportunities. Those identifying as not Hispanic were more likely to give excellent or good ratings to the variety of business and service establishments in Boulder and shopping opportunities. Those living in the Gunbarrel and South Boulder areas were less likely to positively rate the overall quality of business and service establishments in Boulder. Those living in the Crossroads area were more likely than their counterparts to positively rate the variety of business and service establishments in Boulder. Residents in the University of Colorado area were more likely than their counterparts to give high marks to shopping opportunities (for more detail, see *Appendix D: Responses to Selected Survey Questions by Respondent Characteristics*).

Figure 9: Economy Characteristics Compared by Year

Prior to 2023, "Vibrancy of downtown/commercial area" was "Vibrant downtown/commercial area".

Figure 10: Economy Characteristics Benchmark Comparisons

Please rate each of the following in the Boulder community. (Percent excellent or good)	National benchmark	Front Range benchmark
Overall quality of business and service establishments in Boulder	Similar	Higher
Vibrancy of downtown/commercial area	Higher	Much higher
Shopping opportunities	Higher	Much higher
Variety of business and service establishments in Boulder	Similar	Higher
Employment opportunities	Similar	Higher
Cost of living in Boulder	Much lower	Lower

Feelings of Safety

Over 9 in 10 Boulder residents indicated that they feel at least somewhat safe in their neighborhood during the day, a mark that was lower in 2023 compared to 2018. Over 8 in 10 survey respondents indicated that they feel very or somewhat safe in Boulder, based on their personal identity. Over 7 in 10 residents indicated that they feel safe from violent crime, in Boulder's downtown/commercial area during the day (a decrease in 2023 compared to 2018), and in city parks, facilities, and trails.

Boulder ranked similar to the national and Front Range benchmarks for feelings of safety in most areas, where comparisons were available (see Figure 12). However, Boulder ranked lower than the national benchmark for feeling of safety from property crime, and much lower for feelings of safety from fire, flood, or other natural disaster. Boulder also ranked lower than the Front Range benchmark for feelings of safety from fire, flood, or other natural disaster.

Residents in the Colorado University area were more likely than their counterparts to feel safer in Boulder and from various types of crime. Residents living in the Central Boulder area were generally less likely than their counterparts to feel safer in Boulder and from various types of crime. Men, and those able to cover all of their essential expenses without accumulating debt, were generally more likely than their counterparts to feel safe in Boulder and from various types of crime (for more detail, see *Appendix D: Responses to Selected Survey Questions by Respondent Characteristics*).

From property crime	Lower	Similar
From violent crime	Similar	Similar
From fire, flood, or other natural disaster	Much lower	Lower

Feeling Accepted and Welcome in Boulder

Residents were asked for the first time in 2023 how welcome and accepted they feel in the Boulder community. About 9 in 10 residents indicated that they feel very welcome or somewhat welcome at city parks, trails, and facilities. More than 8 in 10 respondents indicated that feel safe and accepted at city-sponsored community engagement activities and in the Boulder community, based on their identity.

Those identifying as Hispanic were less likely to feel welcome at city-sponsored community engagement activities compared to those identifying as not Hispanic. Men were more likely than women to feel welcome and accepted at city parks, trails, and facilities. Those unable to cover all of their essential expenses without accumulating debt were less likely to feel welcome and accepted at city-sponsored community engagement activities and in the Boulder community, based on their personal identity (for more detail, see *Appendix D: Responses to Selected Survey Questions by Respondent Characteristics*).

Figure 13: Feeling Welcome and Accepted in Boulder

City Government

The City of Boulder Community Survey included several questions aimed at measuring City services, government performance, and decision-making.

City Services

When asked to rate the overall value of Boulder services, 6 out of 10 residents rated the value as excellent or good. This rating was lower in 2023 compared to 2018. This measure was similar to both the national and Front Range benchmark comparisons (see *Appendix E: Detailed Benchmark Comparisons* for detailed information on the benchmark comparisons).

Survey respondents who were unable to cover all their essential expenses without accumulating debt were less likely than their counterparts to positively rate the value of services for the taxes paid to Boulder (See *Appendix D: Responses to Selected Survey Questions by Respondent Characteristics*).

Figure 14: Value of City Services, 2023

Figure 15: Value of City Services Compared by Year

Residents were asked their opinion on the quality of 31 individual services provided to them by the City of Boulder (see Figure 16 below). At least 9 in 10 respondents positively rated fire services, sewer services, recreational opportunities in Boulder open space, and drinking water. More than 8 in 10 residents gave high marks to recreation programs or classes, ambulance or emergency medical services, recreation centers or facilities, preservation of natural areas, storm water management, and city parks. Most other services were rated highly by at least half of residents. The lowest-rated services, affordable high-speed internet access, snow removal, code enforcement, crime prevention, land use, planning, and zoning, and street repair, were positively rated by at least one-third of residents.

A number of services received lower ratings in 2023 compared to 2018. These services included: Drinking water, recreation programs or classes, ambulance or emergency medical services, recreation centers or facilities, preservation of natural areas (open space, farmlands, and greenbelts), storm water management (storm drainage, dams, levees, etc.), city parks, overall customer service by Boulder employees, recycling/composting, fire prevention and education, public information and communication, bus or transit services, police/sheriff services, land use, planning, and zoning, street repair, snow removal, code enforcement (weeds, abandoned buildings, etc.), and crime prevention.

Although many services decreased in quality in 2023 compared to 2018, all available community comparisons were either similar to or higher than the Front Range benchmarks. Similarly, all items available for national benchmark comparisons were either similar or higher, apart from police/sheriff services, crime prevention, and snow removal which were lower (*see Appendix E: Detailed Benchmark Comparisons* for more information.)

When differences were significant, those identifying as white or Asian, those able to cover all of their essential expenses without accumulating debt, men, and residents age 18-34 tended to provide higher ratings to various city services (*see Appendix D: Responses to Selected Survey Questions by Respondent Characteristics* for more detail).

Figure 16: Quality of City Services Compared by Year and Benchmarks

Please rate the quality of each of the following services in Boulder: (Percent excellent or good)	2023	2018	2016	National benchmark	Front Range benchmark

Please rate the quality of each of the following services in Boulder: (Percent excellent or good)	2023	2018	2016	National benchmark	Front Range benchmark
Land use, planning, and zoning	40%	51%	52%	Similar	Similar
Street repair	34%	50%	47%	Similar	Similar

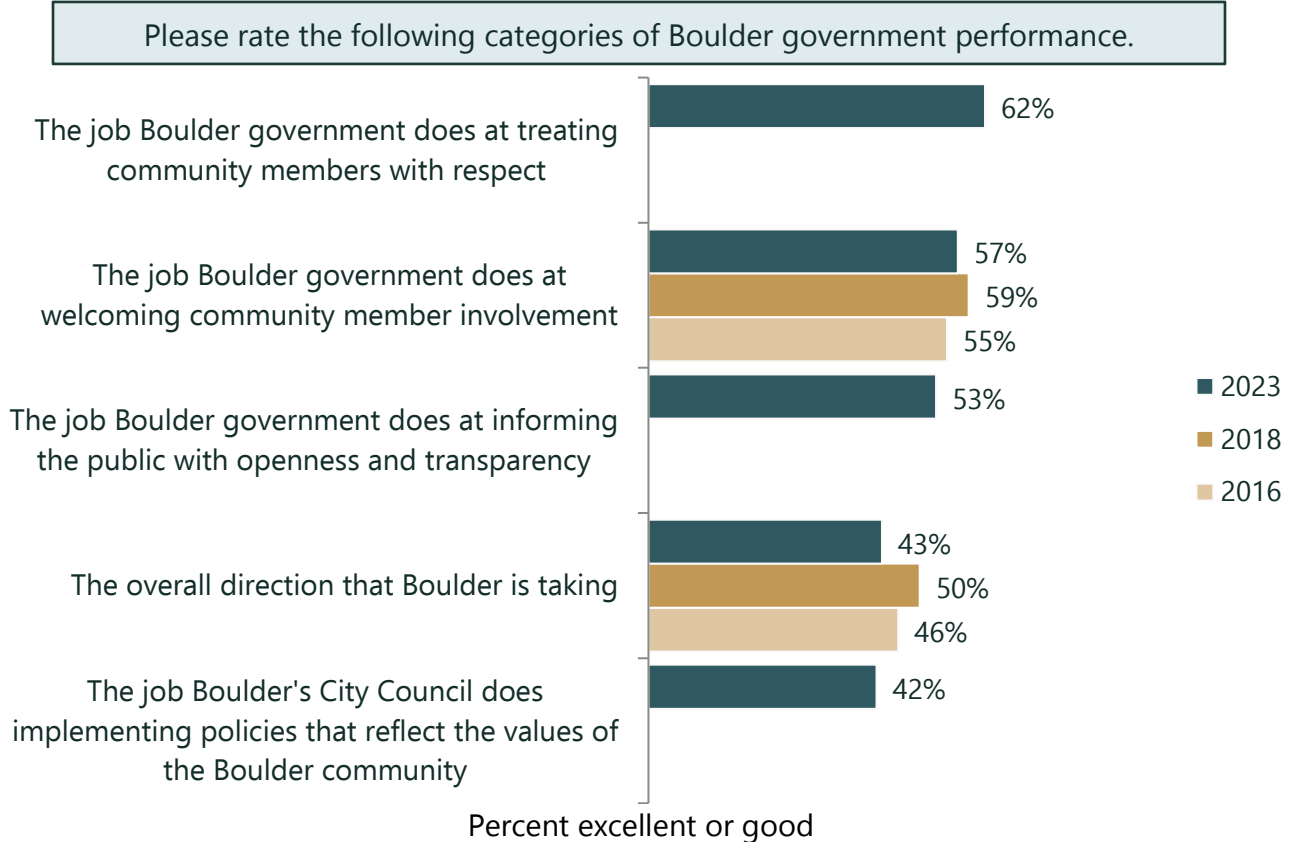

Prior to 2023, "Public information and communication" was "Public information services", "Storm water management (storm drainage, dams, levees, etc.)" was "Storm drainage", "Utility billing" was "Water utility billing", "Animal management" was "Animal control", "Preservation of natural areas (open space, farmlands, and greenbelts)" was "Preservation of natural areas such as open space, farmlands and greenbelts", and "Recycling and composting" was "Recycling". At least 30% of respondents said "don't know" when rating the following services: Code enforcement, ambulance or emergency medical services, fire services, fire prevention and education, and yard waste pick-up. The responses presented in the body of the report are for those who had an opinion. The full set of responses, including "don't know" can be found in Appendix B: Complete Survey Frequencies.

Government Performance

Over 6 in 10 survey respondents rated the job Boulder government does at treating community members with respect as excellent or good. More than half praised the job Boulder government does at welcoming community member involvement (similar to previous years) and informing the public with openness and transparency. Fewer than half of residents highly rated the overall direction that Boulder is taking (lower in 2023 compared to 2018) and the job Boulder's City Council does at implementing policies that reflect the values of the Boulder community. All ratings were similar to both national and Front Range benchmark comparisons.

Those living in the CU and Crossroads areas were more likely than their counterparts to positively rate the overall direction that Boulder is taking. Additionally, those in the Colorado University area were more likely than those living in other areas to positively rate the job Boulder government does at informing the public with openness and transparency and the job Boulder's City Council does implementing policies that reflect the value of the Boulder community. Those living in the Gunbarrel and Southeast Boulder areas were less likely than their counterparts to positively rate the job Boulder government does at treating community members with respect. Men, those able to cover all of their essential expenses without accumulating debt, and residents between the ages of 18-34 were generally more likely than their counterparts to positively rate aspects of government performance (see *Appendix D: Responses to Selected Survey Questions by Respondent Characteristics* for more detail).

Figure 17: Aspects of Government Performance Compared by Year

Prior to 2023, "The job Boulder government does at welcoming community member involvement" was "The job Boulder government does at welcoming citizen involvement".

Figure 18: Government Performance Benchmarks

Please rate the following categories of Boulder government performance. (Percent excellent or good)	National benchmark	Front Range benchmark
The job Boulder government does at informing the public with openness and transparency	Similar	Similar
The job Boulder government does at welcoming community member involvement	Similar	Similar
The job Boulder government does at treating community members with respect	Similar	Similar
The job Boulder government does at informing the public with openness and transparency	Similar	Similar
The overall direction that Boulder is taking	Similar	Similar

City Decision-Making

Nearly 3 in 10 Boulder residents indicated that they provided input to the City as a part of City decision-making in the past 12 months. Residents living in the Palo Park area of Boulder, those identifying as Asian, and those able to cover all of their essential expenses without accumulating debt were less likely than their counterparts to have provided input to the City in the last 12 months (see Appendix D: Responses to Selected Survey Questions by Respondent Characteristics).

Figure 19: Provided Input in City Decision-Making, 2023

In the past 12 months, have you provided any input to the city as a part of city decision-making?

Those who indicated that they had provided input to the City in the past 12 months were then asked if they believed that their input was heard, even if the outcome wasn't ultimately what they preferred. A little more than half of respondents indicated that they believed their input was heard. Those identifying as not Hispanic and those unable to cover all of their essential expenses without accumulating debt were less likely than their counterparts to believe that their input was heard.

Figure 20: Belief that Input was Heard

Do you believe that your input was heard, even if the outcome wasn't ultimately what you preferred?

City Government Focus Areas

Survey respondents were asked about several areas of potential for the City to focus on.

Diversity, Equity, and Inclusion

Nearly 7 in 10 survey participants indicated that it is either essential or very important for local government to focus on creating a diverse, equitable, and inclusive city. About 1 in 10 residents felt that creating a diverse, equitable, and inclusive city is not at all important.

Residents living in the Colorado University and Crossroads areas, as well as those with an income of less than \$200,000, women, and those between the ages of 18-34 were more likely than their counterparts to feel that it is essential or very important that local government focus on creating a diverse, equitable, and inclusive city (see Appendix D: Responses to Selected Survey Questions by Respondent Characteristics).

Figure 21: Importance of Diversity, Equity, and Inclusion

How important is it that local government focuses on creating a diverse, equitable, and inclusive city?

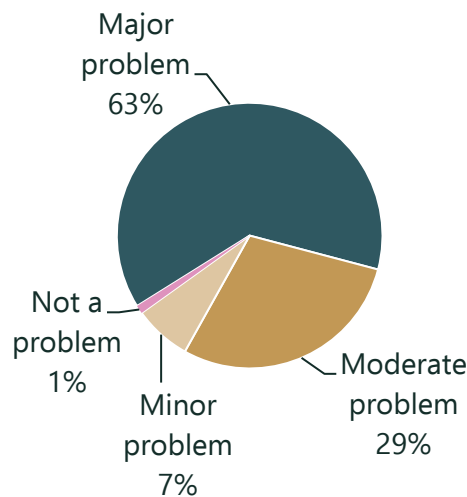

Homelessness

Over 9 in 10 Boulder residents indicated that homelessness is a major or moderate problem in the City. Only 1% of respondents indicated that homelessness was not a problem in Boulder. Residents living in the Central Uni-Hill and Palo Park areas, as well as women, and those age 35+ were more likely than their counterparts to indicate that homelessness is a major or moderate problem (see Appendix D: Responses to Selected Survey Questions by Respondent Characteristics).

Figure 22: Homelessness

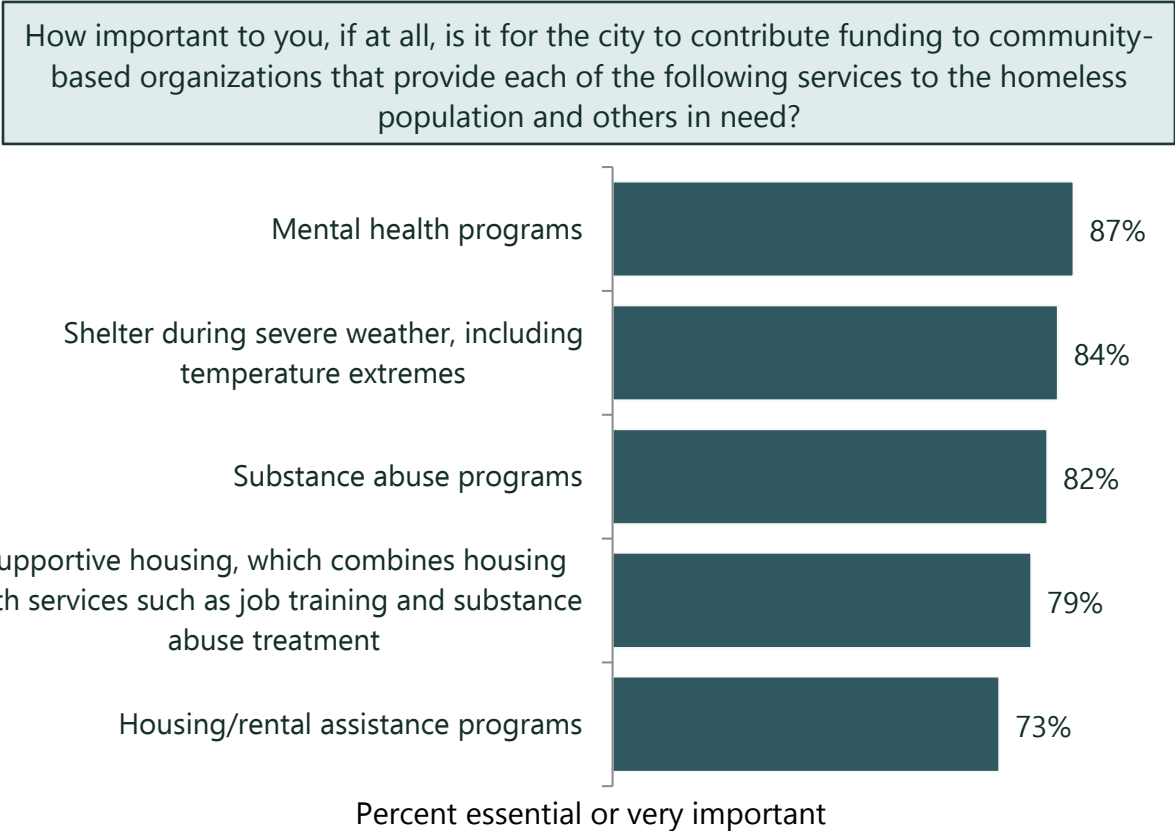

To what degree, if at all, is homelessness a problem in the City of Boulder?

Survey participants were then asked to rate the importance of providing funding to community-based organizations that provide services to the homeless population and others in need. More than 8 in 10 residents indicated that it is either essential or very important to contribute funding for mental health programs, shelter during severe weather (including severe temperatures), and substance abuse programs. Over 7 in 10 respondents indicated that it is essential or very important to contribute funding for supportive housing, which combines housing with services such as job training and substance abuse treatment, as well as housing/rental assistance programs.

Survey participants with an income of \$200,000 or more, men, those age 35+, and those living in the Central Boulder, South Boulder, or Southeast Boulder were generally less likely than their counterparts to support the contribution of funding to community-based organizations (for additional differences, please see *Appendix D: Responses to Selected Survey Questions by Respondent Characteristics*.)

Figure 23: Importance of Contributing to Services for Homeless, 2023

Housing

Over 7 in 10 residents indicated that they felt it is essential or very important for the City to encourage the preservation of small starter homes (homes with fewer rooms or other amenities that are affordable for first-time buyers). About 6 in 10 indicated that it is vital for the City to encourage medium-density development. More than half of survey respondents indicated that it is essential or very important for the City to encourage higher-density development, changes to the occupancy levels in current housing, and building more accessory dwelling units.

Residents living in the CU and Crossroads areas were more likely than their counterparts to indicate that the City should encourage higher density development and changes to the occupancy levels in current housing. Residents living the Crossroads area were less likely than their counterparts to indicate that the City should encourage the preservation of small starter homes. Men were more likely than women to feel that the City should encourage most types of housing, apart from the preservation of starter homes. Residents age 55+ were less likely than their counterparts to feel that the City should encourage various housing types. Those with an income of less than \$200,000, as well as those unable to cover all of their essential expenses without accumulating debt were more likely than their counterparts to feel that the City should encourage various types of housing (for additional differences, please see *Appendix D: Responses to Selected Survey Questions by Respondent Characteristics*.)

Figure 24: City Encouragement of Housing Types

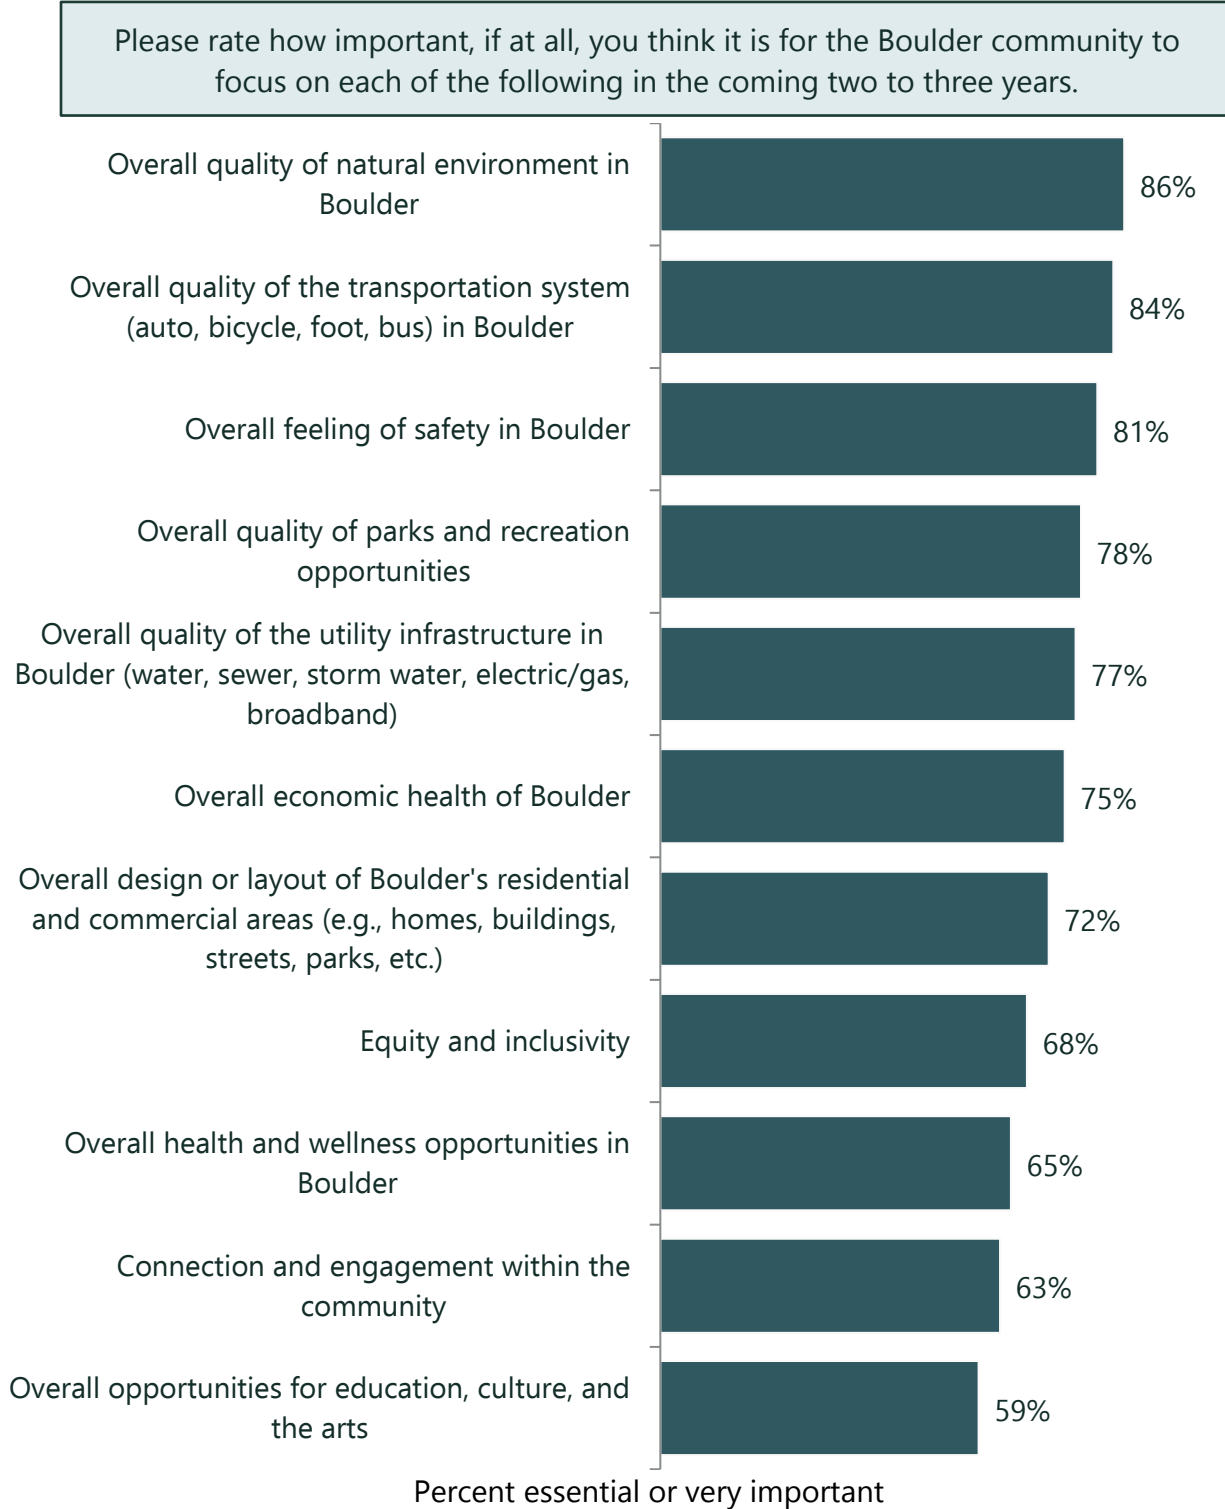

Future Focus Areas

Respondents were asked to indicate how important it is for the City to focus on various aspects of Boulder in the next two to three years. More than 8 in 10 residents felt that it is either essential or very important for the City to focus on the overall quality of natural environment in Boulder, the overall quality of the transportation system, and the overall feeling of safety in Boulder. More than 7 in 10 respondents indicated that it is vital for the City to focus on the overall quality of parks and recreation opportunities, overall quality of the utility infrastructure, overall economic health, and overall design or layout of Boulder’s residential and commercial areas. Over 6 in 10 felt it is either essential or very important to focus on equity and inclusivity, overall health and wellness opportunities, and connection and engagement within the community. About 6 in 10 indicated that they feel a focus on overall opportunities for education culture, and the arts is important.

Residents with an income of \$200,000 or more were more likely than their counterparts to feel that a focus on the overall feeling of safety in Boulder and the overall quality of parks and recreation opportunities were essential or very important. Women were more likely than men to indicate that they would like the City to focus on the overall feeling of safety in Boulder and equity and inclusivity. Those identifying as Asian were generally more likely than their counterparts to want the City to focus on all areas. Those identifying as Hispanic were more likely than their counterparts to indicate

that they would like the City to focus on the overall feeling of safety in Boulder, overall quality of natural environment, and overall quality of parks and recreation opportunities. Those living in the CU and Crossroads areas were less likely than their counterparts to indicate that they want the City to focus on the overall feeling of safety in Boulder. Those living in the Crossroads area were more likely than those living in other areas to indicate that it is essential or very important for the City to focus on equity and inclusivity (for additional differences, please see *Appendix D: Responses to Selected Survey Questions by Respondent Characteristics*.)

Figure 25: Focus Areas in the Coming Years, 2023

Appendix A: Respondent Characteristics

The following tables summarize the demographic characteristics of Boulder’s survey respondents in 2023.

Table 1: Question D1 without "don't know" responses

In general, how many times do you:	Several times a day		Once a day		A few times a week		Every few weeks		Less often or never		Total	
	%	N	%	N	%	N	%	N	%	N	%	N
Visit social media sites such as Facebook, Twitter, Nextdoor, Instagram, etc.	45%	N=395	17%	N=149	13%	N=110	5%	N=47	19%	N=169	100%	N=869

Boulder Weekly	23%	N=197	40%	N=345	37%	N=313	100%	N=856
Local TV/radio stations	19%	N=161	40%	N=341	41%	N=349	100%	N=851
Other online news sources, like Boulder Reporting Lab or the Boulder Beat	25%	N=210	34%	N=287	42%	N=358	100%	N=855
Word of mouth from family, friends, community connectors or neighbors	53%	N=457	41%	N=357	6%	N=50	100%	N=865

Appendix C: Verbatim Responses to Open-Ended Questions

Following are verbatim responses to the open-ended question on the survey. Because these responses were written by survey participants, they are presented here in verbatim form, including any typographical, grammar or other mistakes. The responses are grouped by category and are in alphabetical order.

Question D9: What is your race/ethnicity? – Other

- European American.
- Heterogeneity within/beneath umbrella of both "whiteness," and its associated skin privilege.
- human being, will share 23andme DNA report if requested. Questions like this perpetuate racism, especially the one drop concept.
- Italian native - 1/2 african, 1/2 western European
- ITALIAN.
- Jewish
- Latino
- Middle Eastern
- mix of races and ethnicities
- MIXED RACE.
- MIXED.
- Multi race, Indian American
- Multiple
- None of your ***** business
- Persian
- Prefer not to answer
- PUNJAB - SIKH.
- Racially mixed.
- SOUTH ASIAN.

Appendix D: Responses to Selected Survey Questions by Respondent Characteristics

The subgroup comparison tables contain the cross tabulations of selected survey questions by respondent characteristics. Chi-square or ANOVA tests of significance were applied to these breakdowns of survey questions. A “p-value” of 0.05 or less indicates that there is less than a 5% probability that differences observed between groups are due to chance; or in other words, a greater than 95% probability that the differences observed in the selected categories of the sample represent “real” differences among those populations.

For each pair of subgroups that has a statistically significant difference, an upper-case letter denoting significance is shown in the category with the larger column proportion. The letter denotes the category with the smaller column proportion from which it is statistically different. Differences were marked as statistically significant if the probability that the differences were due to chance alone were less than 5%. Categories were not used in comparisons when a column proportion was equal to zero or one.

Items that have no upper-case letter denotation in their column and that are also not referred to in any other column were not statistically different.

For example, in Table 43 on page 72, 94% of residents who identified as Hispanic (B) gave excellent or good ratings to Boulder as a place to live. This proportion of residents (B) was statistically higher than residents who identified as not Hispanic (A).

Comparisons by Race and Ethnicity

Table 43: Quality of Life Ratings by Race and Ethnicity

Please rate each of the following aspects of quality of life in Boulder: (Percent "excellent" or "good")	Race			Ethnicity		Overall
	White	Asian	Other race or Multi-racial	Not Hispanic	Hispanic	
	(A)	(B)	(C)	(A)	(B)	(A)
Boulder as a place to live	87%	90%	85%	86%	94% A	86%

Overall quality of parks and recreation opportunities	78%	72%	76%	88% A B C	72%	79%	78%

Please rate how important, if at all, you think it is for the Boulder community to focus on each of the following in the coming two to three years. (Percent "essential" or "very important")	Income				Are you able to cover all of your essential expenses without accumulating debt?		Overall
	Less than \$50,000	\$50,000 to \$99,999	\$100,000 to \$199,999	\$200,000 or more	No	Yes	
	(A)	(B)	(C)	(D)	(A)	(B)	
Overall health and wellness opportunities in Boulder	67%	64%	63%	67%	70%	64%	65%
Overall opportunities for education, culture, and the arts	67% D	57%	61%	53%	63%	58%	59%
Connection and engagement within the community	75% B C D	60%	66% D	54%	64%	62%	63%
Equity and inclusivity	77% D	68% D	74% D	54%	76% B	66%	68%

Table 90: Degree to Which Homelessness is a Problem by Income

To what degree, if at all, is homelessness a problem in the City of Boulder (Percent "major problem" or "moderate problem")	Income				Are you able to cover all of your essential expenses without accumulating debt?		Overall (A)
	Less than \$50,000	\$50,000 to \$99,999	\$100,000 to \$199,999	\$200,000 or more	No	Yes	
	(A)	(B)	(C)	(D)	(A)	(B)	
To what degree, if at all, is homelessness a problem in the City of Boulder?	91%	90%	93%	95% B	91%	92%	92%

Table 91: Funding for Services for Those in Need by Income

How important to you, if at all, is it for the city to contribute funding to community-based organizations that provide each of the following services to the homeless population and others in need? (Percent "essential" or "very important")	Income				Are you able to cover all of your essential expenses without accumulating debt?		Overall (A)
	Less than \$50,000	\$50,000 to \$99,999	\$100,000 to \$199,999	\$200,000 or more	No	Yes	
	(A)	(B)	(C)	(D)	(A)	(B)	
Job training programs	80% C D	71% D	65% D	55%	65%	67%	67%
Mental health programs	90%	88%	88%	85%	91%	86%	87%
Substance abuse programs	82%	84%	83%	80%	85%	82%	82%
Shelter during severe weather, including temperature extremes	92% B D	85% D	86% D	76%	81%	84%	84%

How important to you, if at all, is it for the city to contribute funding to community-based organizations that provide each of the following services to the homeless population and others in need? (Percent "essential" or "very important")	Income				Are you able to cover all of your essential expenses without accumulating debt?		Overall
	Less than \$50,000	\$50,000 to \$99,999	\$100,000 to \$199,999	\$200,000 or more	No	Yes	
	(A)	(B)	(C)	(D)	(A)	(B)	
Housing/rental assistance programs	88% B C D	77% D	74% D	60%	83% B	71%	73%
Supportive housing, which combines housing with services such as job training and substance abuse treatment	84%	81%	76%	78%	81%	78%	79%

Table 92: Housing Choices by Income

There are different ways that a community can try to ensure there are a wider variety of housing choices. How important, if at all, do you think it is that the city encourage each of the following? (Percent "essential" or "very important")	Income				Are you able to cover all of your essential expenses without accumulating debt?		Overall
	Less than \$50,000	\$50,000 to \$99,999	\$100,000 to \$199,999	\$200,000 or more	No	Yes	
	(A)	(B)	(C)	(D)	(A)	(B)	
Preservation of small starter homes (homes with fewer rooms or other amenities that are affordable for first-time buyers)	88% C D	81% C D	67%	65%	83% B	72%	73%
Building of more accessory dwelling units (apartments or small homes built above garages, in backyards, etc.)	65% B C D	52%	50%	52%	62% B	50%	52%
Medium-density development (like townhouses)	57%	59%	68% A B	64%	64%	61%	61%
Higher-density development (like apartments)	64% D	59% D	61% D	47%	60%	56%	56%
Changes to the occupancy levels (the number of people who can live in) in current housing	62% D	55% D	57% D	44%	65% B	51%	53%

Table 93: Information Sources by Income

Please indicate how much of a source, if at all, you consider each of the following to be for obtaining information about the city government and its activities, events and services (Percent "major source" or "minor source")	Income				Are you able to cover all of your essential expenses without accumulating debt?		Overall
	Less than \$50,000	\$50,000 to \$99,999	\$100,000 to \$199,999	\$200,000 or more	No	Yes

Appendix E: Detailed Benchmark Comparisons

Comparison Data

Polco/National Research Center (NRC)'s database of comparative resident opinion comprises resident perspectives gathered in surveys from over 500 communities whose residents evaluated the same kinds of topics on the Boulder Quality of Life Survey. The comparison evaluations are from the most recent survey completed in each community; most communities conduct surveys every year or in alternating years. NRC adds the latest results quickly upon survey completion, keeping the benchmark data fresh and relevant. The communities in the database represent a wide geographic and population range. National benchmark comparisons and Front Range benchmark comparisons have been provided when similar questions on the Boulder Quality of Life Survey are included in NRC's database.

Interpreting the Results

Ratings are compared when there are at least five communities in which a similar question was asked. Where comparisons are available, four columns are provided in the table. The first column is Boulder's "percent positive." The percent positive is the combination of the top two most positive response options (i.e., "excellent" and "good," "very safe" and "somewhat safe," "essential" and "very important," etc.), or, in the case of resident behaviors/participation, the percent positive represents the proportion of respondents indicating "yes" or participating in an activity at least once a month. The second column is the rank assigned to Boulder's rating among communities where a similar question was asked. The third column is the number of communities that asked a similar question. The final column shows the comparison of Boulder's rating to the benchmark.

In that final column, Boulder's results are noted as being "higher" than the benchmark, "lower" than the benchmark or "similar" to the benchmark, meaning that the average rating given by residents is statistically similar to or different (greater or lesser) than the benchmark. Being rated as "higher" or "lower" than the benchmark means that Boulder's average rating for a particular item was more than 10 points different than the benchmark. If a rating was "much higher" or "much lower," then Boulder's average rating was more than 20 points different when compared to the benchmark.

National Benchmark Comparisons

Table 111: Quality of Life

Quality of Life Items	Percent positive	Rank	Number of communities in comparison	Comparison to benchmark
The overall quality of life in Boulder	85%	124	373	Similar
Boulder as a place to live	86%	158	357	Similar

Table 112: Governance

Governance Items	Percent positive	Rank	Number of communities in comparison	Comparison to benchmark
The overall direction that Boulder is taking	43%	273	339	Similar
The value of services for the taxes paid to Boulder	60%	119	359	Similar
The job Boulder government does at informing the public with openness and transparency	53%	121	257	Similar
The job Boulder government does at welcoming community member involvement	57%	117	336	Similar
The job Boulder government does at treating community members with respect	62%	140	254	Similar
Overall customer service by Boulder employees (police, receptionists, planners, etc.)	78%	168	351	Similar
Public information and communication	71%	99	314	Similar

Table 113: Economy

Economy Items	Percent positive	Rank	Number of communities in comparison	Comparison to benchmark
Overall quality of business and service establishments in Boulder	84%	54	315	Similar
Variety of business and service establishments in Boulder	67%	80	252	Similar
Vibrancy of downtown/commercial area	75%	36	295	Higher
Shopping opportunities	74%	33	317	Higher
Boulder as a place to visit	91%	27	317	Much higher
Boulder as a place to work	75%	77	352	Similar
Employment opportunities	57%	83	325	Similar
Cost of living in Boulder	6%	295	305	Much lower

Table 114: Mobility

Mobility Items	Percent positive	Rank	Number of communities in comparison	Comparison to benchmark
Overall quality of the transportation system (auto, bicycle, foot, bus) in Boulder	77%	14	259	Higher
Ease of travel by car in Boulder	64%	216	323	Similar
Ease of travel by public transportation in Boulder	56%	26	298	Higher
Ease of travel by bicycle in Boulder	82%	7	322	Much higher
Ease of walking in Boulder	81%	34	326	Higher
Ease of public parking	54%	173	294	Similar
Bus or transit services	68%	31	288	Higher
Traffic enforcement	59%	214	348	Similar
Traffic signal timing	57%	112	307	Similar
Street repair	34%	241	347	Similar
Street cleaning	67%	153	316	Similar
Street lighting	65%	136	334	Similar

Mobility Items	Percent positive	Rank	Number of communities in comparison	Comparison to benchmark
Snow removal	47%	224	264	Lower
Sidewalk maintenance	60%	145	317	Similar
Used bus, rail, subway, or other public transportation instead of driving	77%	4	282	Much higher
Carpooled with other adults or children instead of driving alone	75%	1	298	Much higher
Walked or biked instead of driving	91%	3	300	Much higher

Table 115: Community Design

Community Design Items	Percent positive	Rank	Number of communities in comparison	Comparison to benchmark
Well-planned residential growth	37%	189	253	Similar
Well-planned commercial growth	41%	153	253	Similar
Well-designed neighborhoods	52%	138	251	Similar
Preservation of the historical or cultural character of the community	65%	115	250	Similar
Public places where people want to spend time	68%	79	301	Similar
Variety of housing options	23%	285	311	Lower
Availability of affordable quality housing	9%	307	332	Lower
Land use, planning, and zoning	40%	194	317	Similar
Code enforcement (weeds, abandoned buildings, etc.)	47%	148	338	Similar

Table 116: Utilities

Utilities Items	Percent positive	Rank	Number of communities in comparison	Comparison to benchmark
Overall quality of the utility infrastructure in Boulder (water, sewer, storm water, electric/gas, broadband)	78%	59	251	Similar
Affordable high-speed internet access	48%	158	247	Similar
Drinking water	90%	13	314	Higher
Sewer services	92%	8	312	Higher
Storm water management (storm drainage, dams, levees, etc.)	83%	63	323	Similar
Utility billing	66%	172	291	Similar

Table 117: Safety

Safety Items	Percent positive	Rank	Number of communities in comparison	Comparison to benchmark
Police/sheriff services	65%	322	368	Lower
Crime prevention	44%	311	346	Lower
Animal management	76%	123	323	Similar
Ambulance or emergency medical services	87%	184	316	Similar
Fire services	93%	126	335	Similar
Fire prevention and education	74%	200	311	Similar
Emergency preparedness (services that prepare the community for natural disasters or other emergency situations)	66%	160	312	Similar
In your neighborhood during the day	93%	171	330	Similar
In Boulder's downtown/commercial area during the day	77%	271	320	Similar
From property crime	59%	223	261	Lower
From violent crime	77%	180	261	Similar
From fire, flood, or other natural disaster	46%	245	252	Much lower

Table 118: Natural Environment

Natural Environment Items	Percent positive	Rank	Number of communities in comparison	Comparison to benchmark
Overall quality of natural environment in Boulder	94%	3	315	Much higher
Cleanliness of Boulder	62%	233	329	Similar
Water resources (beaches, lakes, ponds, riverways, etc.)	62%	122	233	Similar
Air quality	62%	258	302	Lower
Preservation of natural areas (open space, farmlands, and greenbelts)	86%	3	300	Much higher
Recycling/composting	76%	103	329	Similar
Yard waste pick-up	78%	100	293	Similar

Table 119: Parks and Recreation

Parks and Recreation Items	Percent positive	Rank	Number of communities in comparison	Comparison to benchmark
Overall quality of parks and recreation opportunities	92%	11	257	Higher
Availability of paths and walking trails	94%	6	325	Much higher
City parks	83%	105	327	Similar
Recreational opportunities	93%	4	319	Much higher
Recreation programs or classes	88%	17	320	Higher
Recreation centers or facilities	87%	30	310	Higher
Fitness opportunities (including exercise classes and paths or trails, etc.)	96%	1	302	Much higher

Table 120: Health and Wellness

Health and Wellness Items	Percent positive	Rank	Number of communities in comparison	Comparison to benchmark
Overall health and wellness opportunities in Boulder	93%	3	308	Much higher

Health and Wellness Items	Percent positive	Rank	Number of communities in comparison	Comparison to benchmark
Availability of affordable quality mental health care	28%	225	298	Similar

Table 121: Education, Arts, and Culture

Education, Arts, and Culture Items	Percent positive	Rank	Number of communities in comparison	Comparison to benchmark
Overall opportunities for education, culture, and the arts	85%	19	312	Higher
Opportunities to attend cultural/arts/music activities	80%	15	315	Higher
Opportunities to attend special events and festivals	82%	27	305	Higher
Community support for the arts	78%	43	250	Higher
Availability of affordable quality childcare/preschool	32%	242	309	Similar
Adult educational opportunities	77%	26	301	Higher

Table 122: Inclusivity and Engagement

Inclusivity and Engagement Items	Percent positive	Rank	Number of communities in comparison	Comparison to benchmark
Residents' connection and engagement with their community	56%	130	253	Similar
Sense of community	51%	260	328	Similar
Boulder as a place to raise children	74%	232	360	Similar
Boulder as a place to retire	55%	254	357	Similar
Opportunities to volunteer	85%	18	305	Higher
Opportunities to participate in community matters	68%	65	307	Similar

Table 123: Participation

Participation Items	Percent positive	Rank	Number of communities in comparison	Comparison to benchmark
Contacted the City of Boulder (in-person, phone, email, or web) for help or information	46%	171	329	Similar
Contacted Boulder elected officials (in-person, phone, email, or web) to express your opinion	22%	46	300	Similar
Attended a local public meeting (of local elected officials like City, advisory boards, town halls, HOA meetings)	21%	110	303	Similar
Watched (online or on television) a local public meeting	27%	100	292	Similar
Volunteered your time to some group/activity in Boulder	45%	39	306	Higher
Voted in your most recent local election	81%	72	250	Similar
Visit social media sites such as Facebook, Twitter, Nextdoor, Instagram, etc.	75%	204	249	Similar
Use or check email	98%	45	239	Similar

Table 124: Focus Areas

Importance Items	Percent essential or very important	Rank	Number of communities in comparison	Comparison to benchmark
Overall economic health of Boulder	75%	286	289	Lower
Overall quality of the transportation system (auto, bicycle, foot, bus) in Boulder	84%	9	250	Higher
Overall design or layout of Boulder’s residential and commercial areas (e.g., homes, buildings, streets, parks, etc.)	72%	135	289	Similar

Importance Items	Percent essential or very important	Rank	Number of communities in comparison	Comparison to benchmark
Overall quality of the utility infrastructure in Boulder (water, sewer, storm water, electric/gas, broadband)	77%	246	250	Lower
Overall feeling of safety in Boulder	81%	229	289	Similar
Overall quality of natural environment in Boulder	86%	16	289	Higher
Overall quality of parks and recreation opportunities	78%	124	251	Similar
Overall health and wellness opportunities in Boulder	65%	244	289	Similar
Overall opportunities for education, culture, and the arts	59%	276	289	Lower
Connection and engagement within the community	63%	229	289	Similar

Connection and engagement within the community	63%	5	11	Similar

Appendix F: Survey Methodology

About the Survey

The City of Boulder Quality of Life Survey was first administered in 1987. General resident surveys, such as this one, ask recipients their perspectives about the quality of life in the city, their use of city amenities, their opinions on policy issues facing the city and their assessment of city service delivery. The City of Boulder funded this research. Please contact Chris Passarelli of the City of Boulder at passarellic@bouldercolorado.gov if you have any questions about the survey.

Developing the Questionnaire

The 2023 survey instrument was developed by starting with the version from the previous implementation in 2018. In an iterative process between City staff and NRC staff, a final five-page questionnaire was created.

Selecting Survey Recipients

“Sampling” refers to the method by which survey recipients are chosen. The “sample” refers to all those who were given a chance to participate in the survey. A list of all households within the zip codes serving Boulder was purchased from Go-Dog Direct based on updated listings from the United States Postal Service, updated every three months, providing the best representation of all households in a specific geographic location. NRC used the USPS data to select the survey recipients.

A larger list than needed was pulled so that a process referred to as “geocoding” could be used to eliminate addresses from the list that were outside Boulder’s boundaries. Geocoding is a computerized process in which addresses are compared to electronically mapped boundaries and coded as inside or outside desired boundaries; in this case, within Boulder. All addresses determined to be outside the study boundaries were eliminated from the list of potential households. Each address identified as being within city boundaries was further identified as being within one of nine areas: Central Boulder, Central Uni-Hill, Colorado University, Crossroads, Gunbarrel, North Boulder, Palo Park, South Boulder, and Southeast Boulder. A random selection was made of the remaining addresses to create a mailing list of 6,000 addresses.

To choose the 6,000 survey recipients, a systematic sampling method was applied to the list of households previously screened for geographic location. Systematic sampling is a procedure whereby a complete list of all possible households is culled, selecting every Nth one, giving each eligible household a known probability of selection, until the appropriate number of households is selected. Multi-family housing units were selected at a higher rate as residents of this type of housing typically respond at lower rates to surveys than do those in single-family housing units. In general, because of the random sampling techniques used, the displayed sampling density will closely mirror the overall housing unit density (which may be different from the population density). While the theory of probability assumes no bias in selection, there may be some minor variations in practice

(meaning, an area with only 15% of the housing units might be selected at an actual rate that is slightly above or below that).

An individual within each household was randomly selected to complete the survey using the birthday method. The birthday method selects a person within the household by asking the “person whose birthday has most recently passed” to complete the questionnaire. The underlying assumption in this method is that day of birth has no relationship to the way people respond to surveys. This instruction was contained in the cover letter accompanying the questionnaire.

In addition to the scientific, random sample, a link to an online “opt-in” survey was publicized through various channels including the Boulder website and social media. This opt-in survey was identical to the scientific survey and open to all City residents.

Survey Administration and Response Rate

Each selected household was contacted twice. First, a prenotification announcement was sent to all households on September 5, 2023, informing the household members that they had been selected to participate in the City of Boulder Community Survey. Approximately one week after mailing the prenotification, each household received a second mailing. For one group, the second mailing was a survey containing a cover letter signed by City Manager Nuria Rivera-Vandermyde enlisting participation. The packet also contained a postage-paid return envelope in which the survey recipients could return the completed questionnaire directly to NRC. The other group received a reminder postcard. The online survey was available in English and Spanish, and each mailing contained instructions in all three languages. The paper survey that was sent to households was in English only. Each mailing included a web link for residents to visit if they preferred to take the survey online. Data collection was open through October 17, 2023. The online “opt-in” survey became available to all Boulder residents on October 3, 2023 and remained open for the final two weeks of data collection.

About 2% of the 6,000 surveys mailed were returned because the housing unit was vacant, or the postal service was unable to deliver the survey as addressed. Of the 5,875 households presumed to have received a survey, 895 completed the survey (689 of which were completed online), providing a response rate of 15%. Additionally, responses were tracked by geographic area; response rates by area ranged from 8% to 30%. The response rates were calculated using AAPOR’s response rate #2¹ for mailed surveys of unnamed persons.

¹ See AAPOR’s Standard Definitions here: [http://www.aapor.org/Standards-Ethics/Standard-Definitions-\(1\).aspx](http://www.aapor.org/Standards-Ethics/Standard-Definitions-(1).aspx) for more information

Margin of Error

The 95% confidence interval (or “margin of error”) quantifies the “sampling error” or precision of the estimates made from the survey results. A 95% confidence interval can be calculated for any sample size and indicates that in 95 of 100 surveys conducted like this one, for a particular item, a result would be found that is within three percentage points of the result that would be found if everyone in the population of interest was surveyed. The practical difficulties of conducting any resident survey may introduce other sources of error in addition to sampling error. Despite best efforts to boost participation and ensure potential inclusion of all households, some selected households will decline participation in the survey (referred to as non-response error) and some eligible households may be unintentionally excluded from the listed sources for the sample (referred to as coverage error).

While the margin of error for the survey is generally no greater than plus or minus three² percentage points around any given percent reported for the entire sample, results for subgroups will have wider confidence intervals. Where estimates are given for subgroups, they are less precise.

Survey Processing (Data Entry)

Upon receipt, completed surveys were assigned a unique identification number. Additionally, each survey was reviewed and “cleaned” as necessary. For example, a question may have asked a respondent to pick two items out of a list of five, but the respondent checked three; in this case, NRC would use protocols to randomly choose two of the three selected items for inclusion in the dataset.

All surveys then were entered twice into an electronic dataset; any discrepancies were resolved in comparison to the original survey form. Range checks as well as other forms of quality control were also performed.

NRC uses Polco, an online public engagement tool designed primarily for local governments, to collect online survey data. The Polco platform includes many features of online survey tools, but also includes elements tailored to the civic environment. For example, like NRC’s mailed surveys, surveys on Polco are presented with the city name, logo (or other image) and a description, so residents understand who is asking for input and why. Optionally, Polco can also verify respondents with local public data to ensure respondents are residents or voters. More generally, an advantage of online programming and data gathering is that it allows for more rigid control of the data format, making extensive data cleaning unnecessary.

A series of quality control checks were also performed in order to ensure the integrity of the web data. Steps may include and not be limited to reviewing the data for clusters of repeat IP addresses

² Although this has become the traditional way to describe survey research precision, when opt-in results are blended with scientific results, assumptions about randomness of responses are not the same as when results come only from the random sample. Consequently other terms sometimes are used in place of “confidence interval” or “margin of error,” such as “credibility intervals.” We hew to the traditional way of describing sample-driven uncertainty while we work with the industry to sort out the best ways to describe these new approaches.

and time stamps (indicating duplicate responses) and removing empty submissions (questionnaires submitted with no questions answered).

Weighting the Data

The demographic characteristics of the survey sample were compared to those found in the 2020 Census and the 2021 American Community Survey estimates for adults in the City of Boulder. The primary objective of weighting survey data is to make the survey sample reflective of the larger population of the community. Both samples were weighted independently and then combined into one final dataset.

The characteristics used for weighting were respondent gender, age, housing unit type (attached or detached), housing tenure (rent or own), race, and ethnicity. This decision was based on:

- The disparity between the survey respondent characteristics and the population norms for these variables
- The saliency of these variables in differences of opinion among subgroups
- The historical profile created and the desirability of consistently representing different groups over the years

A special software program using mathematical algorithms is used to calculate the appropriate weights. Several different weighting “schemes” are tested to ensure the best fit for the data.

The results of the weighting scheme are presented in the table on the following page.

2023 Boulder Community Survey Weighting Table

Characteristic	Population Norm	Unweighted Data	Weighted Data
Housing*			
Rent home	52%	27%	50%
Own home	48%	73%	50%
Detached unit	40%	59%	42%

Analyzing the Data

The electronic dataset was analyzed by NRC staff using the Statistical Package for the Social Sciences (SPSS). For the most part, frequency distributions and mean ratings are presented in the body of the report. A complete set of frequencies for each survey question is presented in *Appendix B: Complete Survey Frequencies*. Also included are results by respondent characteristics (*Appendix D: Responses to Selected Survey Questions by Respondent Characteristics*). Chi-square or ANOVA tests of significance were applied to these breakdowns of selected survey questions. A “p-value” of 0.05 or less indicates that there is less than a 5% probability that differences observed between groups are due to chance; or in other words, a greater than 95% probability that the differences observed in the selected categories of the sample represent “real” differences among those populations. Where differences between subgroups are statistically significant, they have been denoted with capital letters.

Appendix G: Open Participation Survey Results

About the Open Participation Survey

After data collection for the address-based survey was underway, a web-based survey was made available to Boulder residents through a link publicized by the City. Residents were able to complete the survey from October 3 - October 17, 2023. A total of 324 responses were received. This section contains results of this open participation, web-based survey. These data were not collected through a random sample, and it is unknown who in the community was aware of the survey; therefore, a level of confidence in the representativeness of the sample cannot be estimated. However, to reduce bias where possible, these data were weighted to match the U.S. Census and American Community Survey (ACS) population norms for Boulder. The results of the weighting scheme for the open participation survey are presented in the table on the following page.

2023 Boulder Community Survey Weighting Table – Open Participation Survey

Characteristic	Population Norm*	Unweighted Data	Weighted Data

Open-Ended Responses

Following are verbatim responses to the open-ended question on the survey. Because these responses were written by survey participants, they are presented here in verbatim form, including any typographical, grammar or other mistakes. The responses are grouped by category and are in alphabetical order.

Question D9: What is your race/ethnicity? – Other

- European
- European American
- Human
- Human
- Jewish
- Multiracial
- No
- Shouldn't matter
- Spanish Irish

Appendix H: Survey Materials

The following pages contain copies of the survey materials sent to randomly selected households within the City of Boulder.

Dear Boulder Community Member,

It won't take much of your time to make a big difference! Your household has been randomly selected to participate in Boulder's 2023 Community Survey. Your participation in this survey is very important—your answers will help the City of Boulder make decisions that affect us all.

In order to hear from a diverse group of residents, the adult 18 years or older in your household who most recently had a birthday should complete this survey. You can go online now and complete the **confidential survey** at:

<https://polco.us/xxplaceholder>

Please do not share your survey link. This survey is for randomly selected households only. The city will conduct a separate survey that is open to all who wish to share feedback just a few weeks from now.

If you have any questions about the survey, please call 303-441-3554. Thank you for helping create a better city!

Sincerely,

Nuria Rivera-Vandermyde
City Manager/Administrador de la Ciudad

Estimado Residente de Boulder,

¡Unos pocos minutos de su tiempo pueden ser de gran ayuda para nuestra comunidad! Su hogar ha sido elegido al azar para participar en la Encuesta de la Comunidad del 2023 de Boulder. Su participación en esta **encuesta confidencial** es muy importante— sus respuestas ayudarán a tomar decisiones que afectan nuestra comunidad.

Puede completar la **encuesta confidencial** en línea en español en:

<https://polco.us/xxplaceholder>

Para acceder a la encuesta en español elija la opción 'español' en la parte superior de la pantalla. **Por favor no comparta el enlace de su encuesta.** Esta encuesta es solamente para hogares seleccionados al azar. Dentro de unas pocas semanas llevaremos a cabo otra encuesta que estará abierta a todos los residentes. Si tiene alguna pregunta sobre la encuesta o si le gustaría recibir una encuesta en español por correo, por favor llame al 303-441-3554. ¡Gracias por ayudar a crear una ciudad mejor!

Atentamente,

Dear Boulder Community Member,

Just a reminder—if you have not yet completed Boulder’s 2023 Community Survey, please do so. If you have completed it, thank you! Please do not respond twice.

Your participation in this survey is very important—your answers will help the City of Boulder make decisions that affect us all.

You can complete the **confidential survey** online now at:

<https://polco.us/xxplaceholder>

If you have any questions about the survey, please call 303-441-3554. Thank you for helping create a better city!

Sincerely,

Nuria Rivera-Vandermyde
City Manager/Administrador de la Ciudad

Estimado Residente de Boulder,

Si aún no ha contestado la Encuesta de la Comunidad de Boulder de 2023, ¡aquí tiene otra oportunidad de hacerlo! Si ya la ha completado, gracias. Por favor no responda dos veces.

Su participación en esta encuesta es muy importante—sus respuestas ayudarán a tomar decisiones que afectan nuestra comunidad.

Puede completar la **encuesta confidencial** en línea en:

<https://polco.us/xxplaceholder>

También puede esperar unos días hasta recibir la encuesta en inglés por correo. **Por favor no comparta el enlace de su encuesta.** Esta encuesta es solamente para hogares seleccionados al azar. Dentro de unas pocas semanas llevaremos a cabo otra encuesta que estará abierta a todos los residentes. Si tiene alguna pregunta sobre la encuesta o si le gustaría recibir una encuesta en español por correo, por favor llame al 303-441-3554.

¡Gracias por ayudar a crear una mejor ciudad!

Boulder, CO
Permit NO. 94

September 2023

Dear City of Boulder Community Member:

Please help us shape the future of Boulder! You have been selected at random to participate in the 2023 Boulder Community Survey. **If you've already completed the survey online, thank you. Please do not respond twice.**

Please take a few minutes to fill out the enclosed survey. Your participation in this survey is very important—especially since your household is one of only a small number of households being surveyed. Your feedback will help Boulder make decisions that affect our city.

A few things to remember:

- **Your responses are confidential and no identifying information will be shared.**
- In order to hear from a diverse group of residents, the adult 18 years or older in your household who most recently had a birthday should complete this survey.
- **You may return the survey by mail in the enclosed postage-paid envelope, or you can complete the survey online at:**

<https://polco.us/xxplaceholder>

Please do not share your survey link. This survey is for randomly selected households only. The city will conduct a separate survey that is open to all who wish to participate just a few weeks from now.

If you have any questions about the survey, please call 303-441-3554.

Thank you for your time and participation!

Sincerely,

Nuria Rivera-Vandermyde
City Manager/Administrador de la Ciudad

Estimado Residente de la ciudad de Boulder:

¡Por favor ayúdenos a moldear el futuro de Boulder! Usted ha sido seleccionado al azar para participar en la Encuesta de la Comunidad de Boulder del 2023. **Si ya completó la encuesta en línea, gracias. Por favor no responda dos veces.**

Por favor tome unos minutos para completar la encuesta adjunta; si usted prefiere completar la encuesta en español, por favor siga las instrucciones abajo para acceder a la encuesta en español por medio de la red. Su participación en esta encuesta es muy importante—especialmente porque su hogar es uno de solamente un número pequeño de hogares que se están encuestando. Sus observaciones le ayudarán a Boulder tomar decisiones que afectarán a nuestra ciudad.

Algunas cosas para recordar:

- **Sus respuestas son confidenciales y no se compartirá ninguna información de identificación.**
- Para poder escuchar a un grupo diverso de residentes, la encuesta la debe completar el adulto de 18 años o más en su hogar que haya celebrado su cumpleaños más recientemente.
- **Puede devolver la encuesta en inglés por correo en el sobre prepagado adjunto, o puede completar la encuesta en línea en español en:**

<https://polco.us/xxplaceholder>

Por favor no comparta el enlace de su encuesta.

Esta encuesta es solamente para hogares seleccionados al azar. Dentro de unas semanas, llevaremos a cabo otra encuesta que estará abierta a todos los residentes.

Si tiene alguna pregunta sobre la encuesta o si le gustaría recibir una encuesta en español por correo, por favor llame al 303-441-3554. ¡Gracias por su tiempo y participación!
